What is this product?

Type

CARMEN (the "Sub-Fund") is sub-fund of BEL CANTO SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to build a diversified portfolio of securities issued by companies or by governments or their local authorities established, listed or traded worldwide.

Investment policy: The Sub-Fund will invest, directly or indirectly through investment funds and ETFs, in fixed income securities and equities of European and North American public or private issuers quoted or traded on European and or North American official stock exchanges or regulated markets while seeking to control economic and monetary risks, but not excluding investments in other OECD and emerging countries.

The Sub-Fund will mainly invest in fixed income instruments. The exposure to these assets will be achieved directly and indirectly through UCITs and UCIs.

The Sub-Fund's fixed income instruments invested directly will be focused on a diversified portfolio of corporate international fixed income securities, rated at least Baa3/BBB- by the main credit rating agencies.

Under normal circumstances, the Sub-Fund's investments in equities will be 40% of the Sub-Fund's net assets, although the Sub-Fund's equity exposure may vary significantly from this level, depending on market conditions. The Sub-Fund's exposure to equities will not exceed 65% of the Sub-Fund's net assets. Furthermore, in case of adverse equities' market conditions, the Sub-Fund might temporarily be fully invested in cash and money market instruments.

The Sub-Fund may also invest more than 10% of its net assets in UCITs and UCIs.

The Sub-Fund may invest up to 30% of its assets in alternative investments.

Alternative investments are considered investment funds or asset classes that are not classified under traditional asset classes, for example absolute return funds (always UCITs), investment funds allowing indirect exposure to basic materials (ETF/funds), convertible bonds, investment

funds allowing indirect exposure to real estate (ETF/funds), and similar eligible assets.

Participation in emerging markets will be limited to 25% of the portfolio. The Sub-Fund could indirectly invest up to 25% of its net assets in non investment grade products.

The Sub-Fund may also invest in derivative instruments such as options, futures and forwards within the limits stated in the prospectus of the Company to achieve the exposure to the asset classes as well as for hedging purposes.

These derivatives may be traded on either a regulated market mentioned in the prospectus of the Company or OTC and entered into with highly rated financial institutions specializing in this type of transactions and participating actively in the relevant market. In this case, this Sub-Fund may hold money market instruments, bonds or cash in order to finance the margin calls.

The Sub-Fund's portfolio may be exposed up to 30% of its value to non USD currencies. To mitigate volatility due to the periodic fluctuations in foreign exchange markets, the Sub-Fund may engage in derivative transactions for the purpose of hedging its currency risk.

The Sub-Fund may invest up to 10% of its net assets in exchange-traded commodities (ETCs), in eligible financial derivative instruments on commodities indices or on indices based on financial derivatives on commodities qualifying as eligible financial indices.

The Sub-Fund is actively managed and it does not follow any benchmark neither for portfolio construction nor for comparison purposes.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

 The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Sub-Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	3 years		
Example Investment:	\$10,000		
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	\$5,420	\$6,580
	Average return each year	-45.80%	-13.02%
Unfavourable	What you might get back after costs	\$8,780	\$9,700
	Average return each year	-12.20%	-1.01%
Moderate	What you might get back after costs	\$10,180	\$10,730
	Average return each year	1.80%	2.38%
Favourable	What you might get back after costs	\$11,450	\$12,190
	Average return each year	14.50%	6.82%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment using a suitable benchmark between 2019 and 2022.

Moderate scenario: this type of scenario occurred for an investment using a suitable benchmark between 2017 and 2020.

Favourable scenario: this type of scenario occurred for an investment using a suitable benchmark between 2018 and 2021.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	\$88	\$279
Annual cost impact (*)	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.3% before costs and 2.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs
