What is this product?

Type

SANTANDER FUTURE WEALTH (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to provide a consistent level of capital growth over a full market cycle. The Sub-Fund will invest directly or indirectly, through UCITS or UCIs, in securities perceived by that the management team as more interesting due to its innovative nature and its expectations of strong appreciation resulting from sustainable, secular changes in economic and social factors such as demographics, lifestyle, technology and the environment, among others.

Investment policy: This Sub-Fund will invest primarily through UCITS and UCIs in equity instruments. At least 75% of the total exposure will be invested (directly and indirectly) in equities, without predetermination by criteria of selection, issuers, markets, currency, capitalization and sector, being able to invest up to 100% of the total exposure in emerging markets, although under normal market circumstances it will be less than 50%.

The remainder 25% may be invested (directly and indirectly, through UCITS and UCIs) in fixed income securities like Government Bonds and corporate bonds which credit ratings are investment grade (rated above BBB- or Baa3 by major rating agencies or market benchmarks at the time of the investment).

The Sub-Fund will continuously invest at least 50% of its net assets directly or indirectly via funds in equity assets, excluding depository receipts and financial derivative instruments. In the case of indirect investments the Sub Fund will take into account the effective equity ratio of the underlying fund. The Sub-Fund may invest up to 30% of its assets in alternative investments.

Alternative investments are considered investment funds or asset classes that are not classified under traditional asset classes, for example

absolute return funds (always UCITS), investment funds allowing indirect exposure to basic materials (ETFs/funds), investment funds allowing indirect exposure to real estate (ETFs/funds), and similar eligible assets.

The exposure to other currencies will be up to 50%.

The Sub-Fund may invest in financial derivative instruments, including futures and swaps, within the limits stated under the headline "Techniques and Instruments" for efficient portfolio management and to gain long or short exposure to assets and markets, as well as for investment, hedging or efficient portfolio management purposes.

The Sub-Fund is actively managed in reference to the MSCI AC World Index (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and valuations. As such, the Investment Manager will not hold all of the Benchmark constituents.

SFDR Classification: The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR").

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in GBP.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depositary: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Sub-Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	3 years		
Example Investment:	£10,000		
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	£1,630	£3,080
	Average return each year	-83.70%	-32.47%
Unfavourable	What you might get back after costs	£8,230	£8,380
	Average return each year	-17.70%	-5.72%
Moderate	What you might get back after costs	£10,520	£11,910
	Average return each year	5.20%	6.00%
Favourable	What you might get back after costs	£13,140	£15,480
	Average return each year	31.40%	15.68%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2021 and 2023.

Moderate scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2016 and 2019.

Favourable scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2015 and 2018.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	£192	£658
Annual cost impact (*)	1.9%	1.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.9% before costs and 6.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
