What is this product?

Type

SANTANDER GO NORTH AMERICAN EQUITY (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The investment objective of the Sub-Fund is to invest its assets in a diversified portfolio of securities issued by US and Canadian companies seeking long term capital appreciation.

The Sub-Fund will be actively managed with the objective of outperforming the S&P 500® Index (the "Benchmark") net of fees over a three to five year period. This is a target only and not a guaranteed outcome.

Investment policy:

Under normal market conditions the Sub-Fund will primarily invest in equities of established large-capitalization companies, seeking attractive investment opportunities on an individual company basis, with a bottom-up stock selection process. This will also include American Depository Receipts (ADRs) and Global Depository Receipt (GDRs).

The Investment Manager will favour well-known companies with sustainable competitive advantages and the ability to redeploy capital at high rates of return.

The Sub-Fund will invest in companies that are considered underappreciated due to one or more of the following factors: relative lack of coverage, conventional valuation bias, expert bias and short term bias. Usually the investment idea generation will come from regularly analysing company developments, industry experts, and the Investment Manager's fundamental research, among others.

In order to achieve its investment objective, this Sub-Fund will mainly invest its assets in equities, although depending on the opportunities of the markets it could invest as well in 95 exchange traded and over-the-counter options, futures and other financial derivative instruments within the limits stated in headline "Techniques and Instruments" to achieve the exposure to equity markets and as further described below.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the Sub-Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	3 years		
Example Investment:	USD 10 000		
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 1 120	USD 870
	Average return each year	-88.80%	-55.69%
Unfavourable	What you might get back after costs	USD 4 130	USD 5 500
	Average return each year	-58.70%	-18.07%
Moderate	What you might get back after costs	USD 10 950	USD 13 120
	Average return each year	9.50%	9.47%
Favourable	What you might get back after costs	USD 18 720	USD 21 350
	Average return each year	87.20%	28.77%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2021 and 2023.

Moderate scenario: this type of scenario occurred for an investment between 2019 and 2022.

Favourable scenario: this type of scenario occurred for an investment between 2018 and 2021.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	USD 154	USD 561
Annual cost impact (*)	1.5%	1.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.0% before costs and 9.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
