What is this product?

Type

SANTANDER MULTI ASSET AGGRESSIVE GROWTH (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The objective of the Sub-Fund is to provide long term growth to the investors by investing its portfolio in different asset classes a variate of asset classes.

Investment policy: The Sub-Fund will invest directly, or indirectly through third party investment funds, in fixed income securities and equities of European and North American companies but not excluding investments in other OECD and emerging countries.

Under normal circumstances the Sub-Fund's exposure to equities will be between 40% and 80% of the Sub-Fund's net assets. Furthermore, in case of adverse equities market conditions this Sub-Fund might temporarily be invested up to 60% of its net assets in money market instruments.

The Sub-Fund's maximum exposure to fixed income instruments, including money market instruments, investment grade short term treasury bonds and short-term fixed income mutual funds, will be 60% of its net assets. The Sub-Fund may invest up to 50% of its net assets in fixed income instruments whose ratings are lower than Baa3/BBB-. Under normal circumstances the average rating of the fixed income instruments will be BBB- with a minimum rating of B-. In case of a rating downgrade of any debt securities that the Sub-Fund may have invested in, the Sub-Fund could be exposed to distressed/defaulted securities. In this case, the Management Company and the Investment Manager would make reasonable efforts so that this exposure will not exceed 10% of the Sub-Fund's net assets and that the distressed/defaulted securities are liquidated in the best interests of shareholders.

Investments in emerging markets will be limited to 30% of the Sub-Fund's net assets, which may include indirect investments in China, via UCITS and UCIs (including ETFs).

The Sub-Fund may invest up to 20% of its net assets in alternative investments. Alternative investments are considered investment funds or asset classes that are not classified under traditional asset classes. It

includes absolute return funds (always UCITS), investment funds allowing indirect exposure to basic materials (ETFs/funds) and investment funds allowing indirect exposure to real estate (ETFs/funds).

The Sub-Fund's portfolio may be exposed to non-USD currencies up to 30% of its net assets. To mitigate volatility due to the periodic fluctuations in foreign exchange markets, the Sub-Fund may engage in derivative transactions for the purpose of hedging its currency risk. The Sub-Fund may invest up to 10% of its net assets in exchange-traded commodities (ETCs), in eligible financial derivative instruments on commodities indices or on indices based on financial derivatives on commodities qualifying as eligible financial indices.

The Sub-Fund may invest part of its assets in money market instruments to facilitate transactions and flows. The Sub-Fund will not hold more than 20% of its net assets in ancillary liquid assets, being cash and deposits at sight (such as cash held in current accounts) for ancillary liquidity purposes in normal market conditions. Under exceptionally unfavourable market conditions and on a temporary basis, this limit may be exceeded, if justified in the interest of the investors.

The Sub-Fund is actively managed in reference to the 63% MSCI AWCI&10% ICE BofA Global HY Index&24% ICE BofA1-10 year US Corporate&Government&3% ICE BofA US 3-Month Treasury Bill Index.

SFDR Classification: The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") as set out in in Annex I of this Prospectus.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in USD.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Sub-Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		USD 10 000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 6 680	USD 7 470
	Average return each year	-33.20%	-9.27%
Unfavourable	What you might get back after costs	USD 9 120	USD 9 100
	Average return each year	-8.80%	-3.09%
Moderate	What you might get back after costs	USD 10 080	USD 10 260
	Average return each year	0.80%	0.86%
Favourable	What you might get back after costs	USD 10 830	USD 11 080
	Average return each year	8.30%	3.48%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2019 and 2022.

Moderate scenario: this type of scenario occurred for an investment between 2015 and 2018.

Favourable scenario: this type of scenario occurred for an investment between 2016 and 2019.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	USD 223	USD 694
Annual cost impact (*)	2.2%	2.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.1% before costs and 0.9% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
