What is this product?

Type

Santander Prosperity (the "Sub-Fund") is a sub-fund of SANTANDER SICAV, a UCITS incorporated in Luxembourg.

Term

The Sub-Fund is established for an unlimited period. The Sub-Fund may not be unilaterally terminated by Santander Asset Management Luxembourg. The Sub-Fund can be dissolved early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

Objective: The Sub-Fund is an equity fund that strives for economic results, while at the same time seeking to attain its sustainable investment objective through the United Nations Sustainable Development Goals (the "SDGs").

Investment policy: Santander Prosperity is an equity fund with an investment process that integrates a sustainable approach investing in companies that provide solutions to mainly social challenges through their products or services, that can offer superior growth prospects, and by that create social outcomes.

The multilayered investment process is described below.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The selection of the companies is made from the eligible universe to which an avoid harm screen and a positive screen are applied as described below.

An exclusionary screening is applied pre-investment to avoid investing in companies whose activities have significant adverse impacts on sustainability factors and which are therefore not aligned with the Sub-Fund's sustainable investment objective, or that clearly violate recognized international norms and standards. Companies excluded include those who have any business activities related to controversial weapons, armament, tobacco, coal mining, coal-based power generation and fossil fuels. Additionally, there is an analysis of controversies leveraging external data provider research that allows to identify the violation of certain ESG values, such as those promoted by the UN Global Compact. Companies involved in controversies considered critical, are excluded from the Sub-Fund's investment universe.

Once companies with significant adverse impacts have been removed from the investment universe of the Sub-Fund, a positive screening ensures the selection of companies whose business intend to generate positive social outcomes and contribute to the achievement of SDGs, with a particular focus on No Poverty, Good Health and Well-Being, Quality Education, Gender Equality, Decent work and Economic Growth and Reduced Inequalities that are related to three main social themes: 1) Health and Wellbeing, 2) Education and Financial Inclusion and 3) Food and Nutrition.

Companies in the investment universe have a link, through company specific metrics, to underlying indicators of the relevant SDG targets. These metrics are used to measure the attainment of the sustainable objectives.

For a company to be eligible, it must have at least 30% of its revenues related to the SDGs, though can also include other companies that, according to the Investment Manager's assessment, provide a relevant

contribution to solve the main social challenges, that could be reinforced by the Investment Manager's engagement with the relevant companies. After completing the above exclusionary and positive screenings, the Sub-Fund's portfolio construction methodology includes fundamental and quantitative factors in its process. That will allow the Investment Manager to build a portfolio assigning different weightings to the different names to maximize the risk/reward characteristics of the Sub-Fund's overall portfolio.

The Sub-Fund will invest mainly in equities of companies operating in developed countries all over the world. The Sub-Fund may invest up to 20% of its net assets in emerging market countries as defined by MSCI and that are included in the MSCI Emerging Markets Index.

This Sub-Fund is an all-cap fund, which may invest in large cap companies, as well as small/mid cap companies without predetermination of countries or sectors.

The Sub-Fund may invest up to 30% of its net assets in fixed income securities, either through government bonds or corporate bonds with a minimum BBB rating and a duration of less than 3 years.

The Sub-Fund may invest up to 10% of its net assets in UCITS and other UCIs as defined in the Sub-Fund's Prospectus provided that these UCITS/UCIs have also been categorised under article 9 of the SFDR.

The Sub-Fund may invest in money market funds, bank deposits and money market instruments up to 30% of its net assets.

The Sub-Fund may also invest in financial derivative instruments for efficient portfolio management and hedging purposes.

The Sub-Fund can have exposure to currencies other than the Reference Currency up to 80% of the Sub-Fund's net assets.

The Sub-Fund may hold up to 20% of its net assets in cash and deposits at sight for ancillary liquidity purposes in normal market conditions. Under exceptionally unfavourable market conditions and on a temporary basis, this limit may be exceeded, if justified in the interest of the investors.

The Sub-Fund is actively managed in reference to the MSCI World Net Total Return USD Index (the "Benchmark"). The Sub-Fund does not track the Benchmark. The Benchmark is only used for performance comparison purposes.

SFDR Classification: The Sub-Fund has sustainable investment as its objective within the meaning of article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector, as amended ("SFDR") as set out in Annex I of its Prospectus.

Net asset value calculation frequency: Daily, any Luxembourg Business day.

This is an accumulation share class in EUR.

Intended retail investor:

This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 5 years.

Depository: J.P. Morgan SE, Luxembourg Branch.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Sub-Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you may get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Besides the market risks included in the risk indicator, other risks may affect the share performance:

Operational, Sustainability, Currency, Derivatives, Market, Emerging Markets risks. Please refer to the Prospectus for full details about the risks associated with this Sub-Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	5 years		
Example Investment:	€10,000		
	If you exit after 1 year	If you exit after 5 years	
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	€1,300	€1,460
	Average return each year	-87.00%	-31.94%
Unfavourable	What you might get back after costs	€8,630	€9,530
	Average return each year	-13.70%	-0.96%
Moderate	What you might get back after costs	€10,650	€14,890

Favourable	What you might get back after costs	€14,220	€17,790
	Average return each year	42.20%	12.21%

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2022 and 2023.

Moderate scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2018 and 2023.

Favourable scenario: this type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2016 and 2021.

What happens if Santander Asset Management Luxembourg is unable to pay out?

The investor may not face a financial loss due to the default of Santander Asset Management Luxembourg S.A. (the PRIIP Manufacturer). Investors may suffer a financial loss in the event of the insolvency of the depositary, or someone acting on its behalf, which will not be covered by any investor compensation or guarantee scheme. However, this risk is mitigated by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 per year is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	€212	€1,515
Annual cost impact (*)	2.1%	2.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.4% before costs and 8.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
